

Min & Max

MIN

- Returns the minimum value of the selected column
- It works with **character**, **numeric** and **datetime** types

```
SELECT  
MIN(numberOfPackages)  
FROM orders;
```

MIN(numberOfPackages)

1

```
SELECT MIN(shippedto)  
FROM orders;
```

MIN(shippedto)

Altenwerth and Sons

```
SELECT MIN(dateOrdered)  
FROM orders;
```

MIN(dateOrdered)

2020-03-05 13:32:21

- MIN works with character, numeric and datetime datatypes
- DISTINCT has no meaning in MIN

MAX

- Finds the maximum value
- It works with character, numeric and datetime types

```
SELECT  
MAX(numberOfPackages)  
FROM orders;
```

MAX(numberofpackages)

4

```
SELECT MAX(shippedTo)  
FROM orders;
```

MAX(shippedTo)

Zulauf, Hahn and Legros

```
SELECT MAX(dateOrdered)  
FROM orders;
```

MAX(dateOrdered)

2021-02-26 05:41:15

- MAX works with character, numeric and datetime datatypes
- DISTINCT has no meaning in MAX
