

# Counting

# COUNT

- Count the number of rows in a set of values

```
SELECT COUNT (make)
FROM carInventory;
```

**COUNT(make)**

---

1000

```
SELECT COUNT (make)
FROM carInventory
WHERE make = 'Porsche';
```

**COUNT(make)**

---

11

COUNT (value) returns the number of rows in value that **ARE NOT NULL** and returns an integer greater than or equal to zero

COUNT (\*) returns the count of all rows *including nulls* and duplicates and returns an integer greater than or equal to zero

```
SELECT COUNT (*)
FROM carInventory
```
