Average

AVG

- Finds the average of a set of values
- The result is at least as precise as the most precise datatype being averaged

```
SELECT AVG(price)
FROM carInventory
```

AVG(price)
_____
30425.200940

```
SELECT AVG(price)
FROM carInventory
WHERE make = 'Mazda';
```

AVG(price)
_____
31345.935714

AVG **_ONLY_** works on numeric data types

Average of no rows is null – NOT zero
